EDUCATION

Adani University

Bachelor of Technology in Computer Science (AI-ML)

Ahmedabad, Gujarat

Aug 2023 – May 2027

- **CGPA: 8.70/10** (Last Semester: 8.95/10)
- Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Deep Learning, Machine Learning, Engineering Mathematics

American School of Baroda

Higher Secondary Education

Baroda, Gujarat

Graduated May 2023

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, SQL, HTML/CSS

Libraries & Tools: Scikit-Learn, Pandas, NumPy, Matplotlib, React.js, Next.js, Git, Linux, Firebase

Key Competencies: Algorithm Development, Credit Analysis, Financial Derivatives, Statistics, Data Analysis

PROJECTS

Pulse — Financial News Aggregation Platform | *React, Firebase, Python*

- Built a finance-focused platform combining news aggregation, short-form scrolling news reels, and community-driven content.
- Developed a Python-based data pipeline to collect and organize financial news from multiple sources.
- Implemented interactive stock charts and market data visualizations for quick analysis.
- Designed features for users to write blogs, share insights, and connect with others interested in markets and quantitative finance.

Financial Document Analysis | *Python, Deep Learning, NLP*

- Building an end-to-end deep learning pipeline for sentiment analysis on SEC filings and earnings transcripts.
- Classifies financial documents by sentiment, risk level, and market outlook using NLP techniques.

Quant Trading Backtesting Project | *Python, Pandas, Matplotlib*

- Developed SMA, RSI, and combined strategies to evaluate market profitability over historical AAPL data.
- Performed backtesting, optimization, and performance comparison (Sharpe ratio, return, drawdowns).

Recursify + RishiWrites — Technical Blog Platform | *React, Vite, Prism.js*

- Recursify: A technical blog focused on explaining data structures, algorithms, and problem-solving approaches in a structured way.
- RishiWrites: A personal blog covering topics I explore, including quantitative finance, machine learning, cybersecurity, and technology.

Stock Price Prediction System | *Python, Scikit-learn, Pandas*

- Built a predictive analysis tool combining Regression and Classification models on historical market data.
- Performed feature engineering on market indicators and optimized model hyperparameters.

CERTIFICATIONS & ACHIEVEMENTS

JPMorgan Chase & Co. Quantitative Research Virtual Experience | *Forage*

Nov 2025

- Completed a simulation focused on quantitative research methods.
- Analyzed a book of loans to estimate a customer's probability of default.
- Used dynamic programming to convert FICO scores into categorical data to predict defaults.

Career Essentials in Generative AI | *Microsoft & LinkedIn*

Jul 2024

- Acquired skills in Generative AI, Prompt Engineering, Responsible AI, and Copilot.

Competitive Programming and DSA

- **LeetCode:** Solved 550+ problems; Contest Rating 1444 ([Profile](#))
- Practicing data structures and algorithms through regular problem solving and contests.
